DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species 1: Claims 46-57 drawn to specific structure of the reservoir.

Sub-Species A: Claim 56 drawn to two tubes one placed in the other.

Sub-Species B: Claim 57 drawn to two tubes one placed behind the other.

Species 2: Claims 58-60 drawn to specific structure of the cast and support members.

Species 3: Claims 61-63 drawn to driving means.

Species 4: Claims 66 drawn to forming part of a set of syringes.

Species 5: Claims 68-75 drawn to elongated path for drawing blood.

Species 6: Claims 76-81 drawn to cap and protective packaging.

Species 7: Claims 82 and 85-86 drawn to pre-filling the syringe.

Species 8: Claim 83 drawn to specific structure of the piston.

Species 9: Claim 84 drawn to a seal.

IF SPECIES 1 IS CHOSEN PLEASE, CHOOSE ONE SUB-SPECIES. (A OR B).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply

Art Unit: 3763

must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

See above.

The following claim(s) are generic: 44 and 45.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: claims 44, and 45 are anticipated by Yamshita Kiyoshi, Jp-55-07-3352, therefore, the special technical feature linking the species together, does not provide a contribution over the prior art, and no single general inventive concepts exists. Therefore, the election of species is appropriate.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 3763

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. A telephone call was made to Mr. Castel on July 17, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.
